SUMMARY

Recent Computer Science graduate from the University of Wollongong with hands-on full-stack development experience across React, TypeScript, Java/Spring Boot, Node.js, RESTful APIs, databases, and cloud deployment. Built responsive frontend interfaces, backend services, and data-driven features in Agile project environments, with a strong focus on clean, maintainable, and user-centred solutions. Experienced in using AI coding tools such as Claude Code, GitHub Copilot, and Cursor to improve development speed, debugging, documentation, and problem-solving. Interested in contributing to AI-driven products and building reliable software that combines strong engineering practices with practical AI capabilities.

EDUCATION

University of Wollongong

Wollongong, NSW Australia

Bachelor of Computer Science (Double Degree)

Feb 2023 - Dec

2025 Graduated With Distinction

2024 University of Wollongong Excellence Scholarship

Courses: Web Front-end Programming, Data structure and algorithm, Database Design, Java Programming, Software Design

University of Dalian Foreign Languages, China

Dalian, China

Bachelor of Computer Science & Technology (Double Degree)

Sep 2021 - Jan 2023

Graduated with Distinction

Courses: Object Oriented Design and Programming, Mathematics for Computing, Fundamental Programming with Python

SKILLS

Programming Languages: JavaScript, Typescript, Python, C++/C, Java, React.js, HTML5, CSS3, SQL

Frontend Development: React.js, Redux Toolkit, React Router, Tailwind CSS, Bootstrap, Material UI, Responsive Web Design, Component-based UI Development

Backend & API Development: RESTful APIs, JSON, Node.js, Express.js, Spring Boot, ASP.NET Core (.NET), Kafka, API Integration

Cloud & DevOps Tools: AWS, Docker, Git, GitHub, CI/CD Fundamentals

Development Tools: Jira, Figma, UMLet, VS Code, Postman, Agile/Scrum

Soft Skills: Problem-solving, Teamwork, Time Management, Documentation, Communication, Presentation Skills, Fast Learning

WORK EXPERIENCE

Frontend Developer Intern

BinaryMed, Wollongong NSW

July 2025 - Nov 2025

- Developed frontend features for an AI-driven pathology sample inspection platform, supporting near real-time monitoring, anomaly insights, and operational decision-making.
- Built reusable React and Tailwind CSS dashboards for KPI tracking, sensor trends, anomaly visualisation, and detailed inspection workflows.
- Collaborated closely with backend and AI teams to integrate RESTful APIs, connect AI-generated insights to the user interface, and improve data flow across multiple modules.
- Used AI-assisted development tools, including LLM-based coding and debugging tools, to speed up implementation, troubleshoot issues, and improve code quality.

Programming Teaching Assistant

ChinaSoft International Education, Dalian, China

Dec 2025 - Feb 2026

- Supported the delivery of programming courses (Java/Python), assisting students in understanding core concepts
- Provided individual guidance on debugging, algorithms, and coding practices
- Assisted in project-based learning, helping students complete real-world coding tasks
- Collaborated with instructors to develop teaching materials and exercises

GMAssitant

Liaoyang Second Construction Engineering Company, China

Dec 2022 - Jan 2023

- Assisted the General Manager with daily administrative and operational tasks.
- Communicated with project teams, contractors and clients.
- Coordinated internal meetings and prepared meeting minutes.

PROJECTS

Personal Website

Frontend Developer

Feb 2026 - Present

Developed a personal portfolio website to showcase projects and technical skills.

Built responsive UI using HTML , CSS, and JavaScript with a clean and modern design.

Including Home , About , Education , Experience , Projects , Skills , Resume and Contact pages.

[Website Link](#)

MindEase- Meditation Web App

Full Stack Developer

May 2026 - Present

Built a full-stack meditation platform with **Next.js 16 (App Router)**, **React 19**, **TypeScript**, **Tailwind CSS 4**, and **Framer**

Motion.

Implemented authentication and session handling with **Supabase Auth** (email/ password + magic link) and server-side rendering flows.

Designed a **PostgreSQL data model and data access layer using Prisma + Supabase Postgres**, supporting courses/progress , watch history, comments, and meditation logs/journaling.

Delivered key features including a dashboard, guided content libraries, a Zen timer with ambient audio mixing, and a Zen calendar for practice tracking and notes.

Optimized performance and reliability for production deployment on **Vercel**.

ClinicFlow - Smart Clinic Management System (Continue)

Full Stack Developer

Feb 2026 - Present

Developed a clinic management system supporting patient , doctor, and appointment workflows .

Built responsive frontend pages using **React + TypeScript with CRUD functionality**.

Implemented backend REST APIs using **ASP.NET Core (.NET)** and integrated database operations .

[Github Link](#)

AI-powered Microservice System for Manufacturing

Backend Developer

Jul 2025 - Dec 2025

Developed an AI-powered microservice application to optimise and automate production scheduling and organisation for a manufacturing company.

Implemented backend services with **Spring Boot** (JDK 21 , Spring Data JPA , Spring Cloud Stream) .

Developed **REST APIs** for inter-service communication and integrated LangChain4j for LLM-based agentic AI features .

Implemented **stream processing queries** for real-time job queue monitoring and stock level prediction .

[Github Link](#)

AI Car Model Recognition

Developer

Feb 2025 - Jul 2025

Built a deep learning image classification model using Python and PyTorch in Google Cola

Used transfer learning with ResNet-34 to improve training efficiency and accuracy.

Applied data augmentation and preprocessing with Torchvision for better generalisation .

Evaluated model performance using confusion matrix , classification report , and visualisation.

LANGUAGE

- English - Proficient
- Mandarin - Native
